## New Shelter Serves Our **Furry Friends**

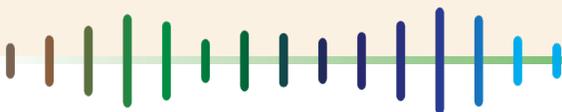

The new Lafourche Animal Shelter building project has been awarded to **Onshore Construction**. It is located on Highway 3185 South in Thibodaux.

"The new facility is going to be an inviting space for volunteers and adopters to take an active role in community animal sheltering. The space will have updated cat housing and six additional dog runs with plenty of outdoor green space for outdoor activities," says Hilary Detillier, Manager of the Animal Shelter. "Our goal is always to increase lifesaving and embolden residents to resolve animal issues outside of the four walls of the animal shelter building. This 'facelift' will be much welcomed by staff and visitors to the animal shelter. We hope to grow our programs and our staff to better serve the residents."

The Lafourche Parish Animal Shelter's mission is to balance the health, safety and welfare of animals and the general population of Lafourche Parish by promoting and motivating responsible pet ownership and adoption.

## We're Off to a Great Start in 2024!

As we enter the first quarter of year 2024, I want to acknowledge that everyone has been working diligently and I know this is only the beginning of what we will continue to do this new year. We have a bright future planned and with continued hard work, we will accomplish our goals as a company. I believe we have the right people in the right place who strive to be better every day. Our employees are motivated, and this is what keeps Onshore a great company and a great place to be day in and day out. I take pride knowing this company helps provide employees and their families steady support. With everyone's continued contributions, Onshore as a whole can remain at the top of our game. Thanks EVERYONE!. – Josh Arabie

## Project Updates:

### Shallow Water Equipment: Artificial Reefs

SWE recently completed the installation of 340 Cajun Corals near Pelican Island for the CCA and Danos. The install of these modules is expected to create fish habitat for an area that has been hit hard with land and structure loss.

Setting 72" Culverts at 105 in Laplace

### Onshore Materials & SWE: West Shore Lake Pontchartrain

Work in Laplace has not stopped throughout the winter and into the spring. Both the 101 and 105 projects have made substantial progress and helped OM push through the winter. At 101 we completed clearing operations with the help of Shallow Water Equipment and began the installation of wick drains with our specialty subcontractor. Despite heavy rains and saturated conditions, sand placement has continued and we hope to be ready to resume embankment operations in March.

On the 105 project, crews have successfully installed another set of 72" drainage pipe and begun installation of sand for a working platform on the project. Shallow Water Equipment has successfully cleared 60% of the site and anticipates completion in early spring. Excavation of the drainage canal and fill placement will begin late March and progress throughout the remainder of the year.

### Onshore Materials: Morganza to the Gulf Levee

Crews at Reach E continue to push forward with the completion of the original scope and the new challenges which accompany our new scope. In addition to placing fill, crews have degraded several sections and work to install reinforcement fabric prior to raising the levee.

Reach E Fabric Installation

### Onshore Materials: Raceland Prairie Project

The Raceland Prairie Project is underway and making progress despite the lingering winter weather. Crews have been working on Reach 1 and Reach 3 to raise the levees to the required grade. Hauling began in February and will likely continue into the fall.

# Employee Spotlight

**Philip Folsie**  
*Field Supervisor*

Philip is 4 Aces' field supervisor and has been with us for nine months. One of our subcontractors commented, "Phil is a pleasure to work with and he has impeccable grammar." Philip's hobbies include hunting, fishing and refurbishing classic air guns.

**Travis Anderson**  
*Lead Man*

Drive, accountability and demeanor are just a few of the qualities that Travis brings to the work table day-in-and-day-out. Despite his young age of 18, his ability to retain and regurgitate information has allowed him to move up in rank and obtain the position of Lead Man on his crew. "His positive attitude and willingness to work hard and in a safe manner spreads like wildfire around the site," says superintendent Zachary Perk. His hobbies include working on small engines, and being in his boat. Thank you Travis for all you do for your crew and this company.

**Amber Dugas**  
*Project Manager & Administrative Assistant*

Amber is always willing to help the next person. Her attitude and caring personality are infectious. She is organized, helpful, motivated and kind-hearted. We are glad to have her as part of the Onshore Construction Company team. Her hobbies include being a cheer and dance mom for her two girls, Kenadee and Regan. She loves spending time with family and friends.

**Eddy Suarez Echevarria**  
*Lowboy Operator*

Eddy's hobbies are fishing, driving trucks, and spending time with his kids. He has worked for 6 years as an Onshore Lowboy Operator. "Awesome worker," "fun to be around and does not complain," "always willing to help," and "all-around good guy" are a few ways people describe Eddy.

**Misty Arabie**  
*Project Administrator/IT Coordinator*

Misty started working at Onshore Materials in January 2021. She is always willing to help the next person wherever needed. Misty likes to use the knowledge she has and share it with others. She puts her heart into her work and into helping the company succeed. She enjoys cooking, entertaining and spending time with family and friends and going to the gym.

# 4 Aces Logistics Improving Efficiency

4 Aces in partnership with Rodco Trucking, Cal-Chlor Louisiana, and Morton Salt are working together to provide Halliburton Fourchon with a Louisiana base solution for their additive salt needs. In recent history, Halliburton has imported their additive salt for offshore purposes from other states or internationally. This option provides a Louisiana solution for rigs and projects based off the Louisiana coast.

4 Aces has provided over 10,000 super sacks of salt to Fourchon so far and plans to grow that number in the near future.

*Each Super Sacks weighs about 2,000 pounds*
